Synertec Attends ISPE Asia CSV Events

In late August 2016, Kylie Brailsford, Synertec's PMO and Validation Group Manager, attended two important Computerised Systems Validation events in Asia. The events comprised a dedicated CSV training seminar in Malaysia, and the CSV stream of the annual ISPE Singapore Conference.

Overall Kylie found that our local CSV experience is current and keeping pace with expectations of the wider region, and that Data Integrity is a hot topic in Asia as it is in Australia.

In Malaysia, Kylie was fortunate to hear from one of the world's leading CSV experts and GAMP author, Tony Margetts. Tony provided a succinct overview of a complete CSV lifecycle, and its application to ERP systems. On the second day, the WHO Guidance on Data Integrity was presented, with the main take away message being that data needs to be managed, whether it's electronic or paper based. Finally David Paspas of Synertec Asia presented an alternative approach to CSV. David's philosophy brings it back to basics and logical, practical thinking and will provide benefit to streamlining CSV projects for Synertec and our clients.

In Singapore, presentations covered topics such as Managing CSV Audits, MES in Pharma, Automated Warehousing, and Data Integrity, again highlighting this as a focus area. The presenters were all experts in their fields and provided good guidance on HOW to achieve positive outcomes in these environments.

Kylie manages Synertec's Project Management Office and Validation & Compliance department, bringing over 20 years' experience in the life sciences, water and oil & gas industries. Her systematic approach allows her to manage projects from both the broad and detailed lenses providing project management and validation approaches that are both practical and compliant.

For any GMP Validation & Compliance enquiries please forward your requests to info@synertec.com.au
