

Project Summary

Client:
Terminals Pty Ltd

Location:
Geelong, Victoria, Australia

Geelong Tank Farm Expansion

<p>Project Summary:</p>	<p>Synertec undertook the detailed design, and managed the tender process for six new 1500m³ bulk storage tanks. Synertec’s scope included the tank and piping design, and co-ordination of all other design disciplines including electrical, civil and structural. Synertec also provided assistance to the Terminals Project Manager during the construction phase.</p> <p>Complex timing requirements required Synertec to manage multiple key construction contractors, where foundations and tanks were built concurrently and tanks were transported and placed on the completed tank bases.</p> <p>As additional flexibility was incorporated into the design to allow interchangeable product storage.</p>
<p>Technologies:</p>	<p>Project features included:</p> <ul style="list-style-type: none"> ○ Design to AS1940 and API650. ○ Town Planning Documentation and Submission Support ○ Design, Project & Construction Management. ○ Brownfield expansion during operations no disruption.
